Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 3 of the above claims, the recitation of "the opposed facing faying surfaces" lack antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Haynes et al (U.S. patent no. 5,913,329). The patent to Haynes et al discloses a pulse valve comprising a pair of members (4, 6) mutually juxtaposed in close, facing relation. The member (4) is rotatable and the member (6) is stationary. The members (4, 6) have respective slots (8). An inlet (14) is provided for supplying a fluid medium. A motor (18) rotatably drives the member (4) relative to the other member (6); see Figure 2 and col. 4, lines 39-61 and col. 5, lines 31-49.

Art Unit: 3753

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Lim et al (U.S. patent no. 5,316,042). The patent to Lim et al discloses a pulse valve comprising a pair of members (46, 94) mutually juxtaposed in close, facing relation. The member (46) is rotatable and the member (94) is stationary. The members (46, 94) have respective slots as shown in Figures 1-3. An inlet (14) is provided for supplying a fluid medium. A motor (34) rotatably drives the member (46) relative to the other member (94). A spring (39) biases the member (46) against the stationary member (94), col. 2, lines 66-68.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kotlyar (U.S. patent no. 4,953,595) and Ishida (U.S. patent no. 3,937,252) are cited for the additional showing of pulse valves.
